

SAVE LUCAS

Thank you, LAMAR, for 25 Billboards ~ Pittsburgh, PA

I Need a DIRECT DONATION

Lucas's doctors say he must have a whole liver, so he will have to receive a cadaver organ.

My name is Lucas Goeller and I am two-years old with end stage liver disease. According to my doctors, my time is limited. Since I was born, I have been in UPMC Children's Hospital in ICU twice, on a ventilator twice, have had two major surgeries, three blood transfusions, under anesthesia 5 times, have been hospitalized two times over a month straight with additional multiple week stays.

I cannot walk on my own and I have very little muscle development. I am sick almost everyday with vomiting and diarrhea. My liver and spleen are getting so big that my lungs cannot expand making it hard for me to breath.

My Medical Needs: Lucas needs an entire liver and is not a candidate for a living related donation.

- Blood type: O-
- Can accept either O- or O+ blood type for a transplant
- UNOS Score: 53
- A significant score, but I have been waiting on the transplant list for over 1.5 years
- Organ: Whole liver including Bile Ducts
- Can accept an infant to an adult liver in the 20's age range

We struggle with the sadness of knowing that when and if we receive the long-awaited call saying there is a liver for Lucas, it will mean another family is going through the heartbreak of losing a loved one. +
